Joomla Virtuemart – PayUMoney Integration

Compatibility – Joomla ver 2.5.x and VirtueMart 2.0.6 and above

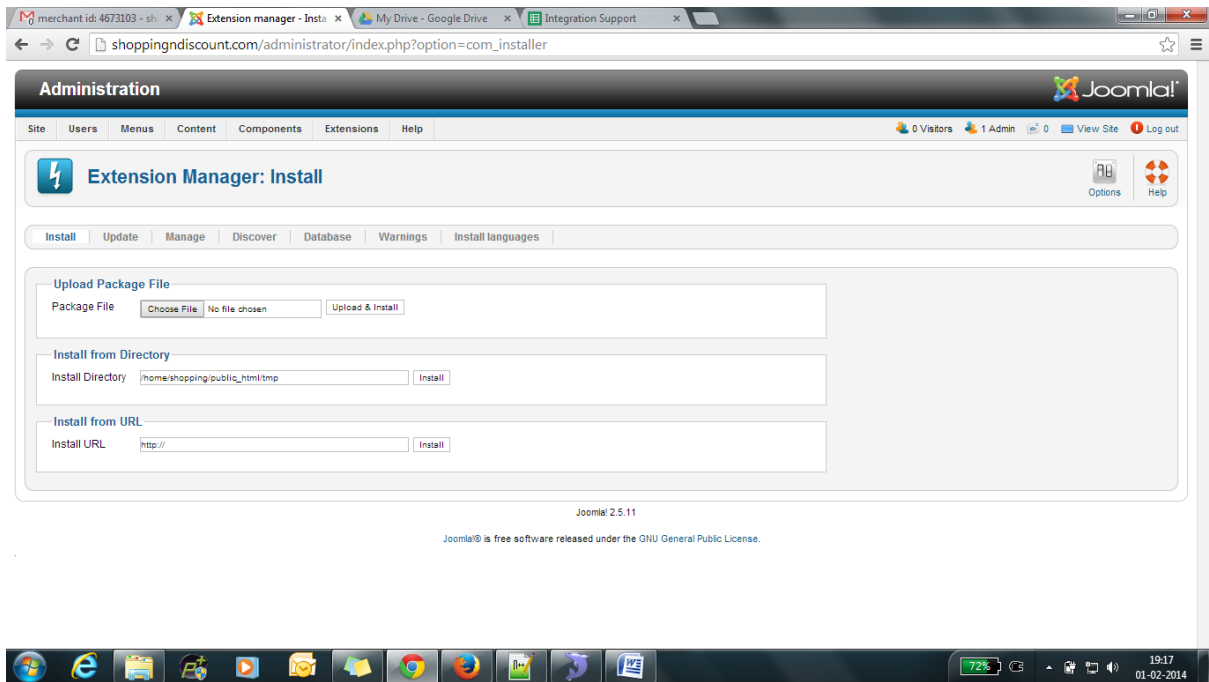

Step 1: Goto your Joomla Admin Panel login page.

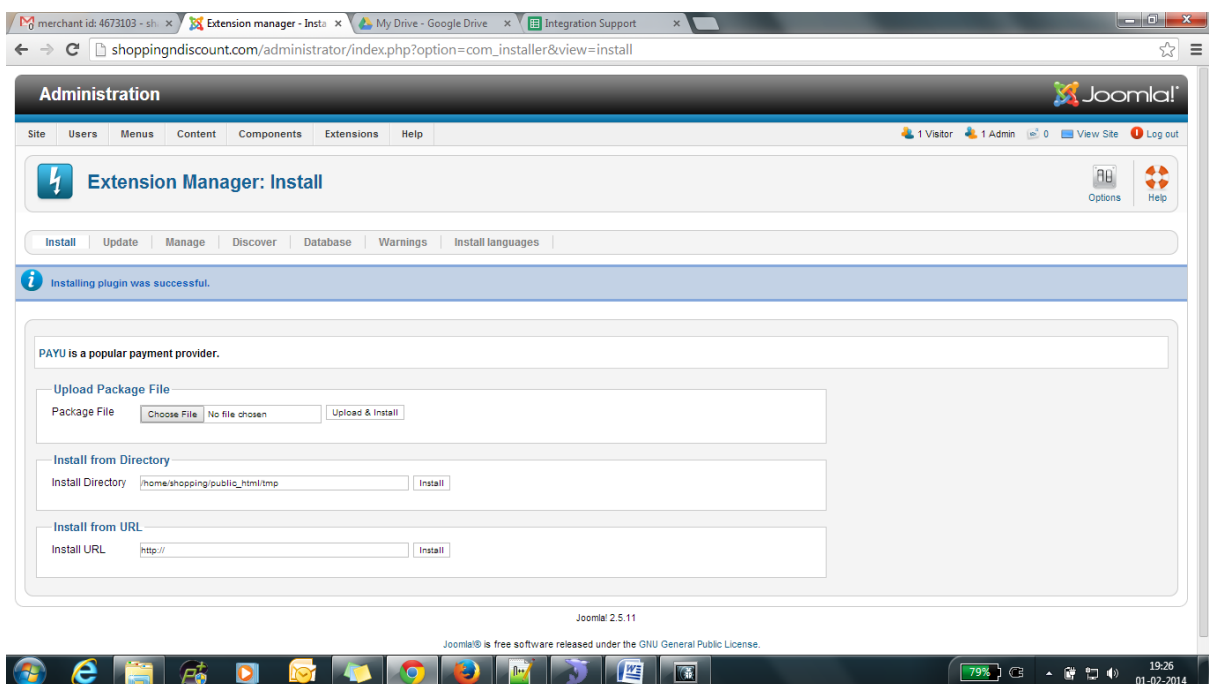

Step 2: On the following screen, hover the mouse on **Extensions** tab and click on **Extension Manager**.

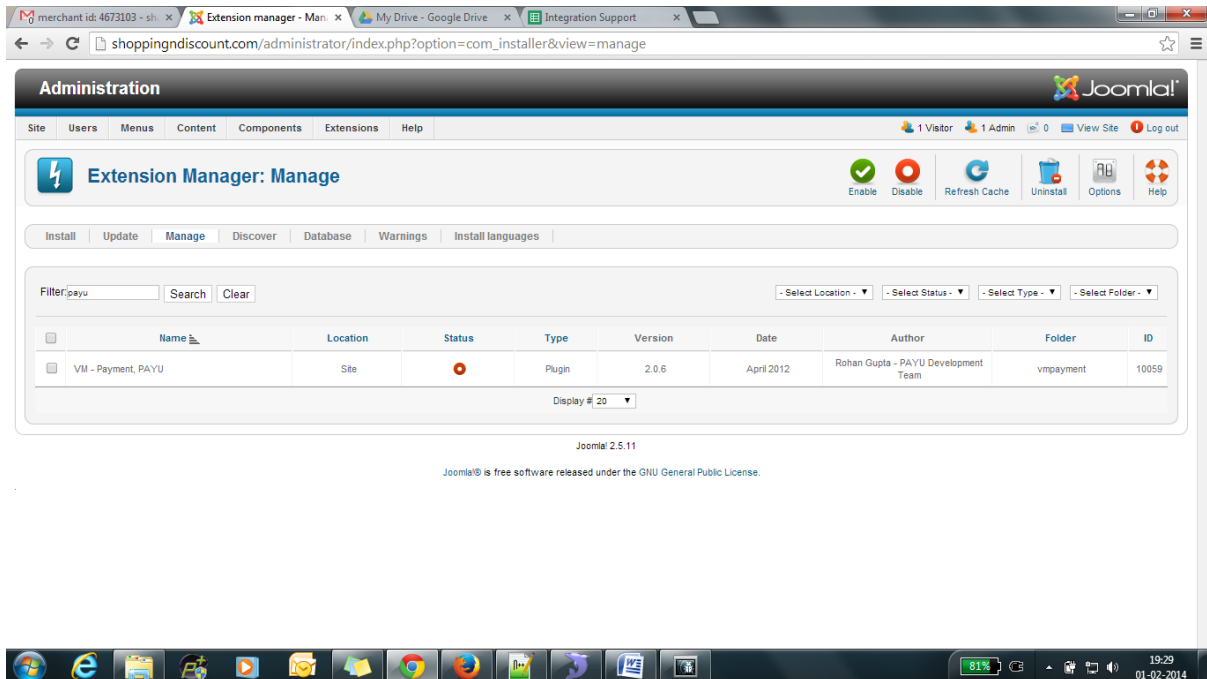

Step 3: You get the following screen. Now click on **Choose File** and click on **Upload & Install**.

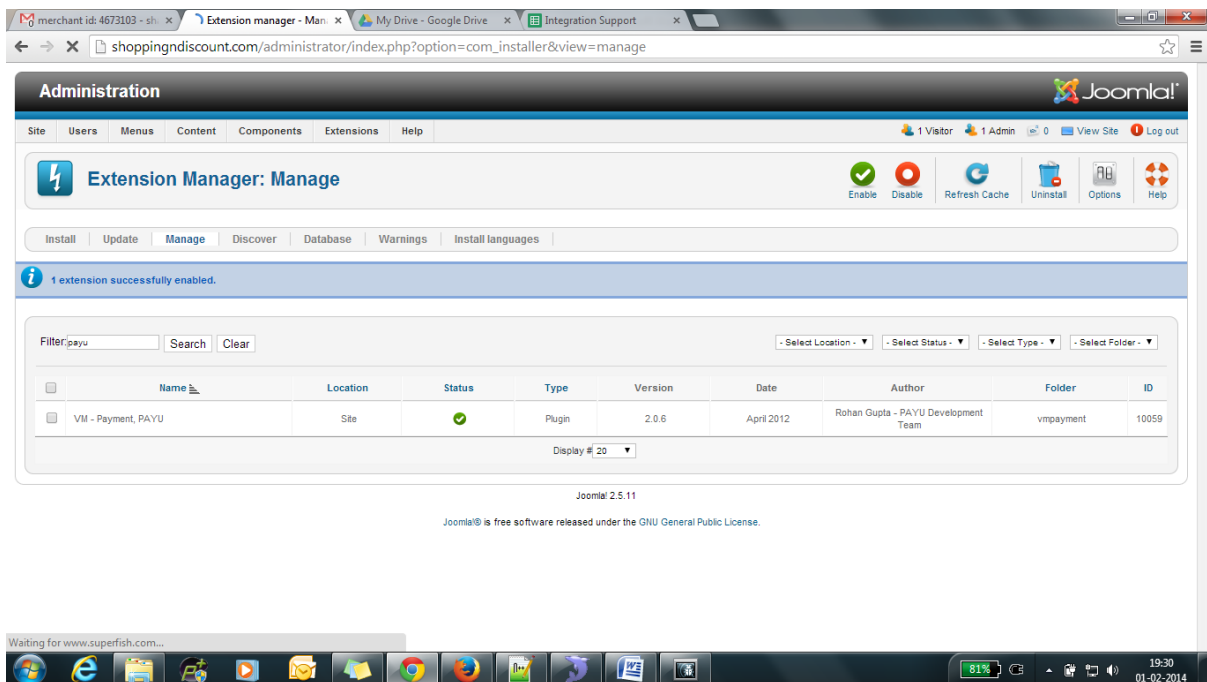

Step 4: Once installed you will get the following screen –

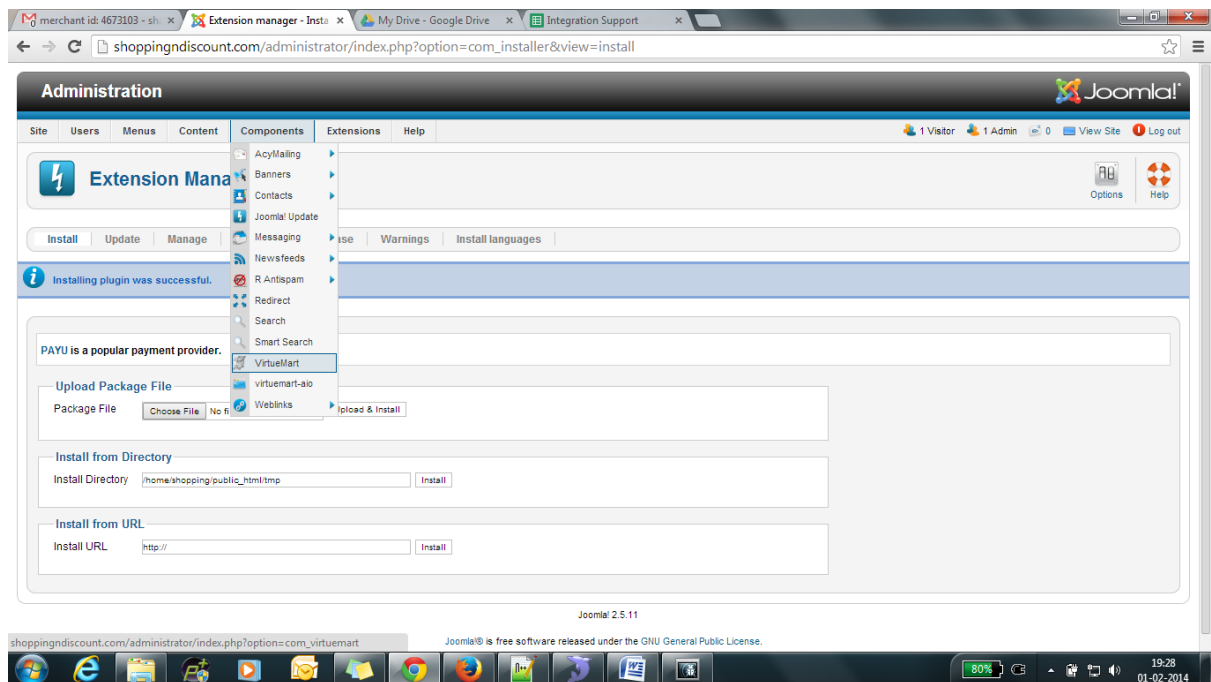

Step 5: Click on **Manage** tab and use the filter to search **VM – Payment, PAYU**. You will notice a red ring against the status column. Now check the box against **VM – Payment, PAYU** and click on the green **Enable** icon on the top.

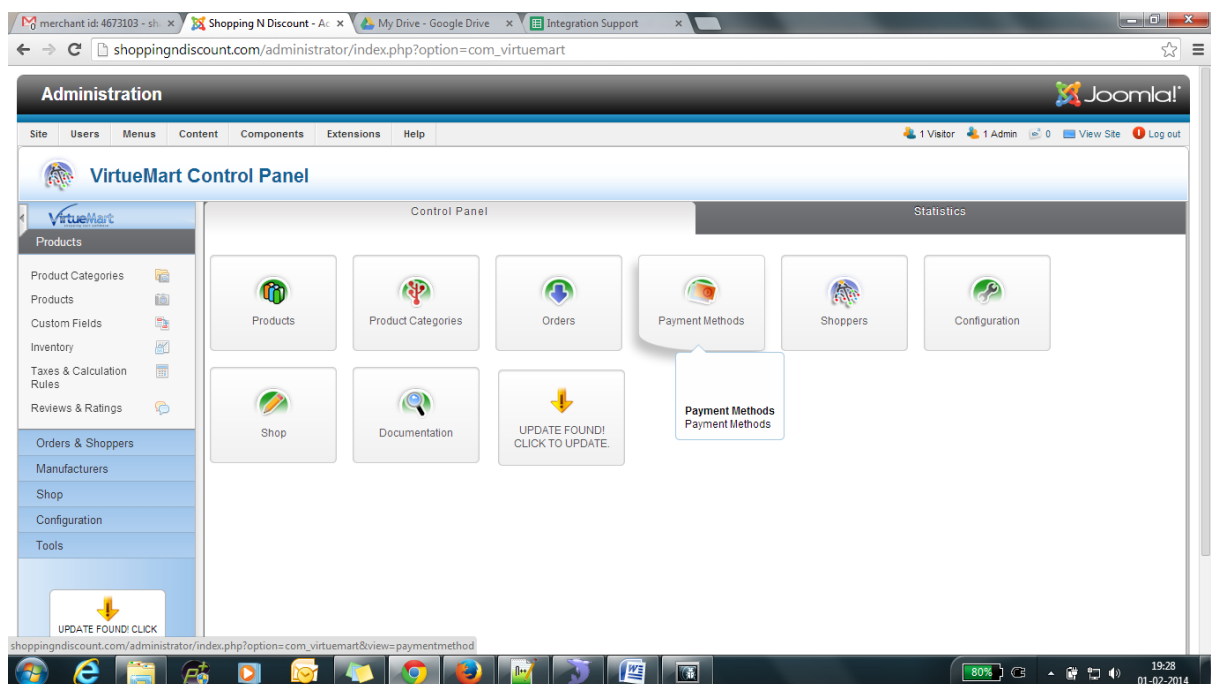

Step 6: You will notice that the status changes to a green logo with a tick-mark. This means the PayUMoney module is enabled now. Check the screenshot for reference –

Step 7: Now hover the mouse over **Components** and click on **Virtuemart**.

Step 8: You will reach the below mentioned screen. Click on **Payment Methods**.

Step 9: Now you will get to the below mentioned screen –

Step 10: Please enter the following details in the above screen –

- (a) Payment Name – Please enter **PayUMoney** here.
- (b) Published – Please select **Yes**.
- (c) Payment Description – You may choose to enter a short description about the payment gateway.
- (d) Payment Method – Please select **VM – Payment, PAYU**.
- (e) Shopper Group – select **default**.
- (f) List Order – Enter **1** here.

Step 11: Now click on **Save** button on the top.

Step 12: On the screenshot in the **Step 11**, click on **Configuration**. You will get the below screen –

Step 13: In the above screen, please fill the below mentioned fields -

S. No.	Entry Field	Test/Demo	Live/Production
1	Logos	payu.jpg	payu.jpg
2	SALT	GQs7yium	Enter the salt provided by PayUMoney
3	MERCHANT_KEY	JBZaLc	Enter the Merchant Key provided by PayUMoney
4	Description	Secure Payment via PayUMoney	Secure Payment via PayUMoney

The remaining fields would be selected by default and you may or may not make any changes.

Step 14: After this, click on the **Save** button on the top. This will conclude the integration.

You can use the below mentioned test credit card credentials to run successful transactions in the test mode –

Credit Card # 5123456789012346

Name – Any Name

Expiry Date – May, 2017

CVV – 123
